

This chart shows the distribution of payment methods used by customers. It helps us understand which payment option (Cash, Credit Card, or E-Wallet) is most popular in the supermarket.

2.Area Chart - Sales Over Time

The area chart displays how total sales have changed over time. It helps to track sales performance across different days or months.

3. Text Table - Sales by Product Line

The text table shows the total sales for each product line. It provides exact numerical sales values, which helps in comparing the performance of different product categories.

4. Highlighted Table - Sales Comparison by City and Product Line

The highlighted table visually compares sales across cities and product lines. The color highlights make it easy to see which products sold best in each city.

5. Word Cloud - Product Line Frequency

The word cloud represents the most frequent product lines purchased by customers. Larger words indicate more sales or higher frequency.

6. Funnel Chart - Sales by Product Line

7. Waterfall Chart - Sales Flow using Total

The waterfall chart displays how sales (Total) increase or decrease across different product lines. It helps to understand the flow and changes in sales step by step.
